

SuperCyclist Cryptograms I

Three bicycle messages are written in secret code below. Each message has a different code. Break the codes and reveal the hidden messages by figuring out which number represents which letter of the alphabet.

For example - in the first code, 2 = F, 6 = I, 8 = N and 11 = S. Some letters for each message have already been revealed for you.

Hint: To help you get started, try to solve short words first. Be sure to insert the correct number under each letter in the code box as shown to keep track of which letters have been revealed. Good luck!
